IP Wales award for AssayMetrics

27th July 2005 -

AssayMetrics is pleased to announce support from government-funded IP Wales to protect the company's new range of fluorescence lifetime dyes.

Pierre Graves, President of AssayMetrics said, "AssayMetrics has a unique approach to fluorescence assay development and this new range of fluorescent dyes will make it easier for assay developers to select the best dye for their fluorescence lifetime or [fluorescence polarization](#) assay."

AssayMetrics was founded in September 2004 to exploit a set of new drug discovery technologies developed in South Wales.
