

## LGC Standards extends portfolio with Cardiff Bioanalytical Services acquisition

04-11-2010

LGC Standards expands its proficiency testing portfolio with the acquisition of a specialist External Quality Assessment provider

LGC Limited has acquired Cardiff Bioanalytical Services Ltd (CBSL), a leading provider of External Quality Assessment (EQA) schemes for clinical and forensic toxicology and therapeutic drug monitoring. The company runs a number of schemes, under the Heathcontrol brand ([www.heathcontrol.com](http://www.heathcontrol.com)), with over 450 participants in over 36 countries. The business will be integrated into LGC Standards, the division of LGC that provides products and services to improve measurement and quality control within the laboratory.

Cardiff Bioanalytical Services Ltd was established in 1979 on the campus of the University Hospital of Wales at Heath Park when it offered EQA schemes for theophylline, digoxin and tricyclic antidepressants. New schemes were introduced over the subsequent years for antibiotics, paracetamol and salicylate measurements.

In 1994 a separate toxicology scheme was established. Over the years continuous development has seen many other drugs added and, most recently, a scheme for measurement of drugs of abuse in oral fluid. The company moved to its current premises in Mount Stuart Square, Cardiff in 1998.

The acquisition will further strengthen LGC Standards' position as one of the world's leading providers of proficiency testing (PT). The current 29 LGC Standards PT schemes encompass chemical, microbiological and physical testing across a wide range of industries including food and beverage, environmental, pharmaceutical and consumer safety. The Heathcontrol schemes further expand this offering into new areas, broadening the PT offering available from one supplier.

During 2011, the CBSL business will be relocated from Cardiff to LGC Standards' brand new, state of the art, purpose built premises in Bury which are due for completion in January.

Dr John Wilson, one of CBSL's directors, commented "We are delighted that LGC has given its commitment to the continued support for our participants and to the educational role of the schemes. LGC's history of growth and development provides an excellent platform for the future of the CBSL business".

Liz Jordain, General Manager, LGC Standards said "The Heathcontrol business provides LGC Standards with an excellent opportunity to expand our PT offering and customer base. LGC Standards' presence in all major European markets, China, Russia and South America means that we shall be able to grow the Heathcontrol business in many territories."

Proficiency testing and external quality assessment schemes are an invaluable quality tool, enabling laboratories to monitor and improve the quality of their analytical measurements by providing an external quality system which is designed to complement their own internal quality control processes.

## Notes to editors

### About LGC Standards

LGC Standards ([www.lgcstandards.com](http://www.lgcstandards.com)) provides products and services to improve measurement and quality control within the laboratory, and is part of LGC, whose Science & Technology Division acts as the UK National Measurement Institute for chemical and bioanalytical measurements. LGC Standards supplies over 100,000 products, including reference materials, pharmaceutical impurity reference standards, biological standards and reagents, as well as proficiency testing and training in analytical quality. LGC Standards is headquartered in Teddington, Middlesex, UK. Its global centre for excellence in proficiency testing is located in Bury (Greater Manchester). LGC Standards has offices in France, Germany, Italy, Poland, Spain, Sweden, China, Russia and the UK, a joint venture presence in India, and representatives in Brazil, Bulgaria, Czech Republic, Finland, Hungary, Ireland, the Netherlands, Romania and Turkey.

### About LGC

LGC ([www.lgc.co.uk](http://www.lgc.co.uk)) is an international science-based company and market leader in analytical, forensic and diagnostic services and reference standards. A progressive and innovative enterprise, LGC operates in socially responsible fields underpinning the safety, health and security of the public and the regulation of industry, for UK government departments and blue chip clients.

LGC operates internationally through four divisions - LGC Forensics, LGC Genomics, LGC Standards and LGC Science & Technology, which includes specialist laboratories delivering contracts for the Department for Business, Innovation and Skills (BIS) and supporting LGC's designated role as the UK's National Measurement Institute for chemical and bioanalytical measurement.

Our operations are extensively accredited to international quality standards such as ISO 17025. With headquarters in Teddington, South West London, the LGC Group employs 1,400 staff in 27 laboratories and centres across Europe and at sites in India and China. Privatised in 1996 and now majority-owned by funds managed by Bridgepoint, LGC was founded almost 170 years ago as the Laboratory of the Government Chemist - a statutory function maintained by LGC today.
